2022 - 2023

www.hb-lux.com

Today's best performance is tomorrow's baseline. The real inspiration comes when you act like you have limitless capabilities. That's how we started the story of creating LIGHT combining your vision and our experience.

You know that feeling of having first unique baby and all family is taking care of him and trying to satisfy and perfectly understand his needs. So that's how Hblux family is working on the projects.

We go above and beyond to create the best innovative customized & HIGHLY BRANDED solutions which elevate your lighting comfort.

HBLUX Technology was created from a partnership between a 20 years Experienced Electrical engineer and 25 years Experienced Architect. These two experiences have been merged to give birth to a brand with the flair of innovation, associating cutting-edge designs with the Electrical/ Electronic technical deep expertise & scrupulous innovative process that guarantees the high quality & reliability.

We design, advise, manufacture unique, proven, & exquisite selection of LED lighting fixtures. Our core focus and reason for being is to Light your projects with the most innovative and high quality outdoor& Indoor Led lighting products. The technicality of our teams allows us to master the in-house entire value chain from design to manufacture.

We have mastered and integrated all major technological developments in the sector and we have created a complete & highly branded range of indoor & Outdoor lighting according to the needs & ideas of our customs.

The company works in accordance with ISO 9001 quality system. Hb-lux is using in the manufacturing process components that meet the European standards and possess proper certificates, from renowned partners such as Meanwell, OSRAM, NICHIA, TRIDONIC, PHILIPS, TCI, VOSSLOH-SCHWABE, SAMSUNG, CREE

We are honored to be the example of an authentic Made in turkey branding, which combines perfectly different types of Indoor & Outdoor bespoke Lighting fixtures which are all designed at our headquarters in Turkey.

Hb-lux is your partner able to satisfy all your lighting needs. Thanks to the collaboration with international designers, the company has developed a culture capable of satisfying even the most demanding markets. We are much more than a manufacturer. We thrive on understanding our clients visions to transform them to technology.

We work with our clients as united team. We believe that unity of purpose is a positive powerful effect of creating meaningful & innovative work.

Where there is unity, there is creativity.

OSRAM

NICHIA

TRIDONIC

PHILIPS

SAMSUNG CREE

In fact, our products have been installed since almost 10 years with optimal customer satisfaction and a number of failures less than 1,2%.

We have an equipped design office in our premises using the latest technological tools performing all days on lighting studies related to warehouses, supermarkets, offices, hotels, car parks, tunnels, sports facilities, Historical area, Public facilities etc.

We realized that when lighting specialists talk about HB-LUX, they basically talk about products . It is true that the quality of our products no longer has to be proven.

HB-LUX is not only products HB LUX is also a team that has over tens of years of experience in LED at your service.

We follow these values in all our chain value starting from design to delivery.

Our success is based on some Pioneer values that make the difference: Innovation, Vigilance and long-lasting.

Hb-lux can vaunt in using one of the most modern CNC controlled machines during the molding process of all our products. The use of such machines allows to us to offer the best delivery times, customized products for each client and to control our products quality.

We are dedicated, passionate and committed to create long lasting products.

Light emitting diode

LED is a semiconductor component that emits light when voltage is applied to it.

Ingress Protection

The first numerical digit describes the rating that is given for solid objects. The 6 here is the highest rating and means the LED is dust tight. The second numerical digit defines how well the LED can keep liquid out.

Color Rendering Index

Color Rendering international system to rate lighting device ability to render object colors. The higher the CRI (based on a 0-100 scale) Natural outdoor light has a CRI of 100.

Safety Classifications Class I

The luminaires in this class have basic electrical insulation and all of their potentially electrically conductive parts are connected to a protective conductor. The protective conductor terminal displays this marking.

Flammable Base.

Luminaires accepted for mounting on a flammable base. If the value exceeds 130°C, "F" marked luminaires shall in addition be tested in accordance with IEC 60598-1 with respect to luminaires without temperature sensing controls.

LED Luminaire Life Test.

LM-80 is a standardised testing method for measuring the lumen depreciation of LED modules or chips over a period of time and under certain set conditions.

Other components, including the LED optical system, heat sink, LED drivers and luminaire housing, should also be taken into consideration to form a full picture of an LED luminaire's projected useable life.

Standard Deviation of Colour Matching.

Thanks to MacAdam ellipses, it's possible to see how much LEDs differ from standard values in colour precision deviations are shown in different steps - (the official unit of measurement is called SDCM)

The colour deviation of an LED must not be more than 6 SDCM.

CE Certificate

Certifies product has met EU (European) consumer safety, health and or environmental requirements.

RoHS Compliance

Restricts the use of certain dangerous substances commonly used in electrical and electronic equipment.

No Ultraviolet (UV) Radiation

Radiant energy in the range of about 100-380 nanometers (nm).

No Infrared Radiation

Electromagnetic energy radiated in teh wavelength range of about 770 to 1.000.000 nanometers (nm).

Low Carbon Dioxide Output (VCO2)

The amount of Co2 exhaled from the body in to the atmosphere per unit time, expressed in milliliters (mL) or liters (L) per minute

Fully Rated Life

The end of the life of an LED is determinated by the point at which the LED fails to deliver at least %70 of initial lumen output. LEDs are commonly marketed as having 50.000 hours of fully-rated lives.

Energy Savings

LED is a highly energy efficient lighting technology, and has the potential to fundamentally change the future of lighting in the world.

Recycling

Unlike low-energy lamps, LED contains no mercury and is therefore not treated as special waste.

European Union Energy Label

The energy efficiency of the appliance is rated in terms of a set of energy efficiency classes from A to G on the label, A being the most energy efficient, G the least efficient.

•HBLUX Technology reserves the right to change the specifications of the products without any notice.

•The products in the catalog cannot be used or published without our knowledge.

ROSA

Floodlight Series

A family of Adjustable floodlight designed in different sizes, Powers and light options. Perfect choice to meet the outdoor lighting requirements which need high technicality and captivating design.

Floodlights for outdoor lighting ROSA, excellent performance in a compact, essential and sturdy design. Totally adjustable and equipped with a wide range of optics, ROSA floodlights are perfect for enhancing architectures and greeneries with accent lighting and decorative effects. It has Small-size, essential design, that integrates seamlessly into any environment.

Key Advantages

- Modern design
- Exceptional thermal system
- High optical precision
- Excellent light output
- High IP protection
- High Ambient temperature
- Easy installation

Characteristics

Aluminium Injection Die Cast Body

Electrostatic Powder Coated

Optional RAL Colors

Adjustable Bracket

Heat & Impact Resistant Extra Clear 5mm Tempered Glass

Aluminium PCB

LED with Life Span >100.000 Hours

CCT tolerance within a 3 step MacAdams ellipse

Corrosion Protection (Optional)

5 Years Warranty

Marine Coating (Optional)

CUBO E27

Floodlight Series

A family of Adjustable floodlight designed in different sizes, Powers and light options. Perfect choice to meet the outdoor lighting requirements which need high technicality and captivating design.

Floodlights for outdoor lighting CUBO E27, excellent performance in a compact, essential and sturdy design. Totally adjustable and equipped with a wide range of optics, CUBO E27 floodlights are perfect for enhancing architectures and greeneries with accent lighting and decorative effects. It has Small-size, essential design, that integrates seamlessly into any environment. It is perfect for the tree installation.

Characteristics

Aluminium Injection Die Cast Body

Electrostatic Powder Coated

Optional RAL Colors

Adjustable Bracket

Heat & Impact Resistant Extra Clear 5mm Tempered Glass

Aluminium PCB

LED with Life Span > 100.000 Hours

CCT tolerance within a 3 step MacAdams ellipse

Corrosion Protection (Optional)

5 Years Warranty

Marine Coating (Optional)

ENEC Certified Driver

Replaceable E27 LED light source

Key Advantages

- Modern design
- Exceptional thermal system
- High optical precision
- Excellent light output
- High IP protection
- High Ambient temperature
- Easy installation

FALCON S

Floodlight Series

A family of Square floodlight which covers a range of three sizes with different Powers and light options, to give multiple Solutions to various projects types. Basic and sophisticated design creating clean and tasteful style.

Falcon is made of Aluminium Injection Die-cast with high quality silicone seal gasket allowing IP66 protection. The design of FALCON Led PCB ensures an easy cool running for the LEDs and all components, which gives long life time to the product. High corrosion resistant suitable for harsh environments. Falcon S is the smallest version which can catch 10W power.

Key Advantages

- Elegant design
- High thermal performance
- High optical precision
- Excellent light output
- High power
- High Ambient temperature
- Easy installation

IN GROUND SERIES

AXIS

In Ground - Drive Over

AXIS is our smallest 1 LED inground which fulfills two important requirements: Small dimensions and powerful light effect.

With a small diameter of 60mm, dimension, Axis recessed inground allows to create powerful and pure light effect. It can be used as a single point of light, thanks to its dimensions. Suitable for installation on floor for outdoor areas, in the drive-over use. Installation in concrete with a recessed box.

Luminaire comes with 2 sides cable as standard.

Key Advantages

- Drive over
- High thermal performance
- High corrosion resistance
- High IP protection
- Excellent light output
- High Ambient temperature
- Easy installation

HYDRO

In Ground - Drive Over

HYDRO is one of our large ingrounds range which fulfills two important requirements: Low energy consumption and high lighting performance.

Highly modern LED recessed ground luminaire which can be adapted to any conceivable installation situation, and which can meet the highest standards of tightness, corrosion resistance, performance, efficiency, handling and form language, and which also offers not just a compromise but a satisfactory and permanent solution even for the most tricky requirements and challenges.

Luminaire comes with 2 sides cable as standard.

Key Advantages

- Drive over
- High thermal performance
- High corrosion resistance
- High IP protection
- Excellent light output
- High Ambient temperature

NANO

In Ground - Drive Over

Ideal for the façades and big trees, NANO is our recessed inground model. Thanks to its high power and universal design, It is perfect for highlighting the architectural values of buildings.

Made Die-cast aluminium and extruded body, Stainless-steel front frame and thermoplastic recessed box. Corrosion free luminaire due to using Zincoprime applied to surface of the luminaire for corrosion. Tempered glass with silicone rubber gasket to guarantee a high level of protection.

Luminaire comes with 2 sides cable as standard.

Key Advantages

- Drive over
- High thermal performance
- High corrosion resistance
- High IP protection
- Excellent light output
- High Ambient temperature
- Easy installation

VAULT

In Ground - Drive Over

Ideal for the façades and big trees, VAULT is our large recessed inground model. Thanks to its large shape with a diameter of 220mm, high power and universal design, It is perfect for highlighting the architectural values of buildings.

Made Die-cast aluminium and extruded body, Stainless-steel front frame and thermoplastic recessed box. Corrosion free luminaire due to using Zincoprime applied to surface of the luminaire for corrosion. Tempered glass with silicone rubber gasket to guarantee a high level of protection.

Luminaire comes with 2 sides cable as standard.

Key Advantages

- Drive over
- High thermal performance
- High corrosion resistance
- High IP protection
- Excellent light output
- High Ambient temperature
- Easy installation

Characteristics

Aluminium Injection Die Cast Body

Electrostatic Powder Paint

Optional RAL Colors

NEPTUNE

In Ground - Drive Over

Neptune is one of our large ingrounds range which fulfills two important requirements: Low energy consumption and high lighting performance.

Highly modern LED recessed ground square luminaire which can be adapted to any conceivable installation situation, and which can meet the highest standards of tightness, corrosion resistance, performance, efficiency, handling and form language, and which also offers not just a compromise but a satisfactory and permanent solution even for the most tricky requirements and challenges.

Luminaire comes with 2 sides cable as standard.

KORDON

Linear In-Ground Drive Over

The standard design makes it easy to combine the three different sizes. Linear recessed inground. The powder coated surface completes the attractive, clear appearance.

To guarantee durability, high-quality materials such as corrosion resistant aluminium, toughened glass and stainless steel are used. An innovative ventilation system prevents condensation. The robust, dust proof housing, which is also protected against sprayed water, allows this lighting tool to be used for many years without any damage or maintenance.

Thanks to the flexibility of the base element, KORDON achieves to meet every need for lighting in several fields of application: walls, surfaces of vehicular traffic, pathways, gardens and parks.

Luminaire comes with 2 sides cable as standard.

FACIEM

Linear In-Ground

A recessed slim inground. Faciem stands for pure light: it produces a light beam which is important when switched on, to disappear from view once it is off.

Those features, with the simple ease of installation, allow Faciem to be used as a single light point or in series on the floor. It can highlight even individual architectural elements such as statues to the utmost. The luminaire is 24V. It makes architecture the protagonist and creates suggestive light paths thanks to its excellent lighting performance and high versatility of use.

Luminaire comes with 2 sides cable as standard.

Key Advantages

- Slim for modern designs.
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance

Characteristics

Aluminium Injection Die Cast Body

BEYOND

Linear In-Ground

A recessed slim inground. BEYOND stands for pure light: it produces a light beam which is important when switched on, to disappear once it is off. Those features, with the simple ease of installation, allow BEYOND to be used as a single light point or in series on the floor.

It can highlight even individual architectural elements such as statues to the utmost. The luminaire is 24V. It makes architecture the protagonist and creates suggestive light paths thanks to its excellent lighting performance and high versatility of use.

Luminaire comes with 2 sides cable as standard.

Key Advantages

- Slim for modern designs.

REET

In Ground - Walk Over

REET Inground is a high-performance, ground-recessed LED projector designed to solve a range of inground lighting drive Way challenges Lights for various applications with a choice of optics, trim, lenses and control options, with aluminium domes.

The plug and play design simplifies installation, protecting the system from water infiltration and ensuring long-lasting performance. Built with robust, high-quality materials that are resistant to harsh environments.

REET is available with Single sided openings to provide different lighting effects based on requirements.

Luminaire comes with 2 sides cable as standard.

Key Advantages

- Walk over
- High thermal performance
- High corrosion resistance
- High IP protection
- Excellent light output
- High Ambient temperature
- Easy installation

BOLLARD SERIES

ALVA

Outdoor type
LED Bollard Lighting

A bollard with perfect volume by primitive shapes and sharp edges, monuments of civilization disappeared. The light is projected through cuts and inclined planes.

Concrete is the central character of this bollard with multiple lighting solutions. Available in many different sizes, in single or double emission, this bollard becomes a light sculpture ideal for walkways, gardens, parks and landscape areas. ALVA is generating a pleasant contrast, suitable for harsh environment.

Key Advantages

- Long lasting silicone gaskets are used
- All external screws and bolts are made of stainless steel.
- Rigid Body

APOLLO

Outdoor type
LED Bollard Lighting

Apollo's soft light cone creates strikingly beautiful light patterns and reveals stylistic finesse, which bewitches both owner and spectator. Thanks to Apollo, stone comes to life and buildings can tell stories. This almost magic effect is due to a very pragmatic approach, namely that extraordinary performance creates extraordinary effects.

The housing made of powder-coated, corrosion-free aluminium forms a uniform and integrated whole, and features a high-quality finish in metallic colours.

Characteristics

Aluminium body

High efficiency LED lighting

Electrostatic powder paint

High quality silicone gasket

CIRCLE

Outdoor type
LED Bollard Lighting

A family of bollards and applique characterized by the balance between sculptural form and lighting technology.

The collection is very wide, with different lighting options. Besides lighting the surrounding environment, the light plays with the lamp-object by revealing and enhancing the volumes. CIRCLE, in all its varieties, is an aesthetically pleasing object also when switched-off, thanks to its design that interacts with daylight, creating shadows and visual softness. The applique is designed to allow a double emission with diffused optic.

Key Advantages

- Simple for modern designs.
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance

Characteristics

Die-cast aluminium body

Extruded pole

High efficiency LED lighting

Electrostatic powder paint

COLUMN

Outdoor type
LED Bollard Lighting

At the heart of the cross-roads in the city, decorative lighting becomes an ideal tool to centralize the functions of public spaces.

The multifunctional COLUMN continues the tradition of HB-LUX's adaptable and customizable products, this time bringing together new functionalities related to the transformation of urban infrastructures. With its customizable laser cutting, it enhances the perfect lighting ambience decors. thanks to its design that interacts with daylight, creating shadows and visual softness. The applique is designed to allow a double emission with diffused optic.

Characteristics

Aluminium body

High Efficiency LED Lighting

PMMA acrylic light diffuser

Electrostatic powder paint

High quality silicon gasket

Anchor system

CCT tolerance within a 3 step MacAdams ellipse

LED with Life Span >100.000 Hours

Corrosion Protection

Aluminium PCB

5 Years Warranty

Marine Coating (Optional)

ENEC Certified Driver

Key Advantages

- Aluminium Body
- Optional Smart modules
- Smart energy savings
- Delivery of complete assembly
- Thermo-lacquered powder paint finish

Applications

CUBE

Outdoor type
LED Bollard Lighting

CUBE combines a squared, elegant shape to radial optics specially designed to ensure the best lighting performance, producing different light effects based on the screen type.

Understated and yet remarkably beautiful, CUBE is a prime example of the efficient power of puristic design. Without unnecessary frills; nothing distracts from the focus on the key essentials: powerful, homogeneous light in a perfectly flawless cylindrical form. Various light distributions, lumen packages, sizes and configurations make these highly adaptable LED outdoor luminaires even more flexible.

Key Advantages

- Flexible bollard
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance

Characteristics

Aluminium body

ENOLA

Outdoor type
LED Bollard Lighting

The modern, minimalist design of the ENOLA product family gives it an air of lightness, which can be taken into account in many design situations. With their high-quality lighting technology, the ENOLA models provide particularly pleasant lighting, which can meet many requirements and lighting situations.

Functionality, energy saving and minimalist style are the features of the new stalks and ENOLA posts, a polyfunctional collection for urban furniture that adapts to environments classical and contemporary. The perfect union between essentiality of volumes and structural solidity, is ideal for projects of spaces in public and private areas, made for sustainability and for the formal harmony.

ESSE

Outdoor type
LED Bollard Lighting

Thanks to its minimal design and its simil corten finishing, Elle coexists armoniously with the nature and with the surrounding space. It is the Outdoor Led bollard ideal for lighting walkways, pedestrian routes, etc.

The ESSE's light beam is projected downwards. It does not dazzle and does not cause light pollution to the environment. The possibility of customized color finishing makes this outdoor Led bollard the ideal product for different contexts and environments.

Key Advantages

- Clear design for all outdoor design
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance

FIGURE

Outdoor type
LED Bollard Lighting

With the straight lines and robust design of FIGURE Bollard, we have made a clear design statement with a reduced, cubic laser cut design approach which gives its soft light an exceedingly stylish frame.

The light source cannot be seen directly, and so the lighting is pleasantly reflected with the laser design. The symmetrical light distribution creates harmonious illumination. The light falls from above into the glassless.

Characteristics

Aluminium body

High Efficiency LED Lighting

PMMA acrylic light diffuser

Electrostatic powder paint

FIZY

Outdoor type
LED Bollard Lighting

Extremely flexible family based on the idea of a round spot using a very elegant joint connecting to the vertical unit. High-quality design and are ideal for the intelligent lighting of paths, forecourts and driveways or green spaces. Their durability and aluminium housing ensure they meet all requirements for installation in public areas. The optional integrated motion detector provides energy-efficient, convenient operation.

FIZY is characterized by a circular base, surmounted by a large aluminum disc housing a circular LED. This outdoor lighting solution is available in many colors, diffusing a soft and pleasant light around the luminaire. This model is available in aluminum gray or in the typical black color.

Characteristics

FROST

Outdoor type
LED Bollard Lighting

Understated and yet remarkably beautiful, FROST is a prime example of the immense power of puristic design. Without unnecessary frills; nothing distracts from the focus on the key essentials: powerful, homogeneous light in a perfectly flawless cylindrical form.

The housing and technical components have been carefully selected to ensure economic efficiency and a long service life for all products in the range. The high quality is also reflected in the numerous benefits in terms of installation, maintenance and operation with IP 66 and the "invisible" with an apparent anchor.

Key Advantages

- Flawless cylindrical form
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance

Characteristics

Aluminium body

High efficiency LED lighting

Electrostatic powder paint

High quality silicone gasket

Galvanized metal anchorage

LED with Life Span >100.000 Hours

CCT tolerance within a 3 step MacAdams ellipse

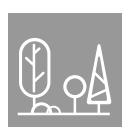

Corrosion Protection

5 Years Warranty

Marine Coating (Optional)

ENEC Certified Driver

GOLD

Outdoor type
LED Bollard Lighting

GOLD combines sober shapes, variety of optics and a sturdy structure, enhancing both residential and urban environments with its pleasant design and a diffused, comfortable lighting, avoiding glare and lighting pollution.

Gold's light effect exceeds all expectations. The unique design of this outdoor bollard and the positioning of the 20 W power led create a wide beam and a powerful play of light that will give your project an expressive and architectural character. Thanks to the indirect position of the LED, there is no risk of direct exposure or glare, without compromising on the light output. Gold can be installed on any hard surface and planted in any lawn if the bollard is associated with a stake.

Characteristics

Aluminium body

High Efficiency LED Lighting

PMMA acrylic light diffuser

Electrostatic powder paint

High quality silicon gasket

Anchor system

LED with Life Span >100.000 Hours

CCT tolerance within a 3 step MacAdams ellipse

Corrosion Protection

5 Years Warranty

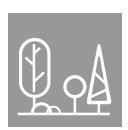

Marine Coating (Optional)

ENEC Certified Driver

Key Advantages

- Glare-free
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance
- Interesting light sculpture

KAR

Outdoor type
LED Bollard Lighting

KAR combines a squared, elegant shape to radial optics specially designed to ensure the best lighting performance, producing different light effects based on the screen type.

The KAR range of outdoor bollard is resplendent in its versatility and clear design style. Yet its star qualities are in no way diva-like. Quite the opposite in fact: it is robust, efficient and flexible. The high-quality lighting tool is suitable for professional use and accentuation in a wide variety of outdoor applications. The standard design makes it easy to combine the three different sizes.

Key Advantages

- Clear design for all outdoor design
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance

LARA

Outdoor type
LED Bollard Lighting

LARA is a family of outdoor bollard. Essential volumes, vintage lines and timeless elegance are the main features of a versatile product that is extremely adaptable to its context of use.

In the second case it can create magical compositions by using elements of different heights, such as small forests of pure light. The fully engineered optics by Lara are presented in a street beam, asymmetrical and circular diffusion. LARA is a lamp designed to give depth and identity to the outdoor composition, both in shape and for the light produced.

MARS ROUND

Outdoor type
LED Bollard Lighting

Bollard for outdoor lighting with a unique style that combines solid shape with sources of remarkable performance.

The proportions and the variety of dimensions make it an element with unlimited applications: reliable and easily inserted in any urban area. The LED light source is shielded and offers considerable visual comfort, lighting without glare and without generating light pollution. This bollard is the ideal solution to complete the urban development and public lighting of parks, car parks and pedestrian paths. Suitable for adding a touch of elegance to a private garden or a private driveway.

Characteristics

- Die-cast aluminium body
- Extruded pole
- High efficiency LED lighting
- PMMA light diffuser
- Electrostatic powder paint
- High quality silicon gasket
- Galvanized metal anchorage
- LED with Life Span >100.000 Hours
- CCT tolerance within a 3 step MacAdams ellipse
- Corrosion Protection
- 5 Years Warranty
- Marine Coating (Optional)
- ENEC Certified Driver

Key Advantages

- Body and support in aluminum to guarantee strength and resistance
- Silicone rubber gasket for high sealing
- Simple for modern designs.
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance

Applications

MARS SQ

Outdoor type
LED Bollard Lighting

Bollard for outdoor lighting with a unique style that combines solid shape with sources of remarkable performance.

The proportions and the variety of dimensions make it an element with unlimited applications: reliable and easily inserted in any urban area. The LED light source is shielded and offers considerable visual comfort, lighting without glare and without generating light pollution. This bollard is the ideal solution to complete the urban development and public lighting of parks, car parks and pedestrian paths. Suitable for adding a touch of elegance to a private garden or a private driveway.

Characteristics

Die-cast aluminium body

Extruded pole

High efficiency LED lighting

PMMA light diffuser

Electrostatic powder paint

High quality silicon gasket

Galvanized metal anchorage

LED with Life Span >100.000 Hours

CCT tolerance within a 3 step MacAdams ellipse

Corrosion Protection

5 Years Warranty

Marine Coating (Optional)

ENEC Certified Driver

Key Advantages

- Body and support in Aluminum to guarantee strength and resistance
- Silicone rubber gasket for high sealing
- Simple for modern designs.
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance

Applications

Landscape

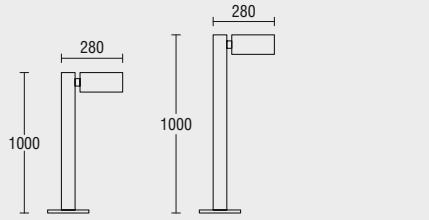

Outdoor

Urban

MINI COAST

Outdoor type
LED Bollard Lighting

The elegant sobriety of the MINI COST, combined with state-of-the-art lighting technology, ensures its over-average versatility. It can easily be integrated in just about any architectural environment and fulfils every requirement – lighting paths in compliance with safety standards, used in a row as a light signet, as design-oriented decorative lighting or as a standard guidance system.

Various light distributions, lumen packages, sizes and configurations make these highly adaptable LED outdoor MINICOASTires even more flexible. Depending on personal taste and the area of installation, MINI COAST can be used as a bollard, stack or pole-top MINICOASTire. When the optional MINICOASTire canopy is added to the latter, it produces a symbolic, almost archetypal effect... without losing its characteristically modern simplicity.

Characteristics

MINI

Outdoor type
LED Bollard Lighting

Functionality, energy saving and minimalist style are the features of the new stalks and MINI posts, a polyfunctional collection for urban Bollard that adapts to environments classical and contemporary.

MINI is characterized by a circular base, surmounted by a large aluminum disc housing a circular LED matrix. This outdoor lighting solution is available in different lengths, diffusing a soft and pleasant light around the MINIire. This model is available in aluminum gray or in the typical black color.

Characteristics

NOOR

This collection is proof that having an attractive external appearance doesn't necessarily mean that you have to forego inner values and steadfast reliability.

The inner values of the bollards of the series NOOR have a lot to offer, too. The LED array effectively saves energy over a long period of time and the highly efficient fibre optics provide for balanced, homogeneous brightness. It is the serie dedicated to the urban furniture, suitable for pedestrian areas and parks.

Key Advantages

- Simple for modern designs
- Economic and efficient

PARK

Outdoor type
LED Bollard Lighting

A simple and structural accent for modern exteriors. Park Outdoor LED bollard provides soft atmospheric lighting to accentuate outdoor spaces and offer guidance along pathways.

Made of aluminum, this cylindrical fixture extends straight upward to allow its light to spill outward. This bollard is an iconic gothic design in a modern reinterpretation to LED sources with outstanding performance, designed to guarantee an high visual comfort, glare-free lighting with no light pollution.

Key Advantages

- Simple and structural for modern designs
- Economic and efficient
- Easy installation
- High performance LED

RIO

Outdoor type
LED Bollard Lighting

The RIO's soft light cone creates strikingly beautiful light patterns and reveals stylistic finesse, which bewitches both owner and spectator. Thanks to RIO, stone comes to life and buildings can tell stories.

This almost magic effect is due to a very pragmatic approach, namely that extraordinary performance creates extraordinary effects. Its Contemporary design with a geometric shape is perfect for enhancing residential and urban areas featuring a modern, industrial design. This bollard creates a direct light beam, thanks to its monodirectional optics, able to enhance a precise area or subject, without glare.

Key Advantages

- Graceful, unmistakable and powerful statement of light
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance

THEO

Outdoor type
LED Bollard Lighting

Understated and yet remarkably beautiful, THEO is a prime example of the immense power of puristic design. Without unnecessary frills; nothing distracts from the focus on the key essentials: powerful, homogeneous light in a perfectly flawless cylindrical form.

The housing and technical components have been carefully selected to ensure economic efficiency and a long service life for all products in the range. The high quality is also reflected in the numerous benefits in terms of installation, maintenance and operation with IP66 and the “invisible” power supply via delicate steel cables inside the diffuser cylinder.

Key Advantages

- Flawless cylindrical form
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance

Characteristics

Aluminium body

High efficiency LED lighting

Electrostatic powder paint

High quality silicone gasket

Galvanized metal anchorage

LED with Life Span >100.000 Hours

CCT tolerance within a 3 step MacAdams ellipse

Corrosion Protection

5 Years Warranty

Marine Coating (Optional)

ENEC Certified Driver

DAISY SINGLE

Outdoor type
LED Bollard Lighting

Innovative LED DAISY.Sire for urban development characterized by a simple and modern design and a robust structure that can accommodate LED sources with radial optics.

Thanks to its minimal design, DAISY coexists harmoniously with the nature and with the surrounding space. It is the Outdoor Led bollard ideal for lighting walkways, pedestrian routes, etc. The DAISY's light beam is projected downwards. It does not dazzle and does not cause light pollution to the environment. The adjustable Project on the top allows many lighting projections. It can be easily connected with the spike mounting style. The possibility of customized color finishing makes this outdoor Led bollard the ideal product for different contexts and environments.

Key Advantages

- Clear design for all outdoor design
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance

Characteristics

STELLA

Outdoor type
LED Bollard Lighting

With the straight lines and robust design of STELLA Bollard, we have made a clear design statement with a reduced, cubic laser cut design approach which gives its soft light an exceedingly stylish frame.

The light source cannot be seen directly, and so the lighting is pleasantly reflected with the laser design. The symmetrical light distribution creates harmonious iSTELLAtion. The light falls from above into the glassless.

Key Advantages

- Laser light reflection
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance
- Interesting light sculpture

LED Bollard Lighting

With the straight lines and robust design of TUNC Bollard, we have made a clear design statement with a reduced, cubic laser cut design approach which gives its soft light an exceedingly stylish frame.

The light source cannot be seen directly, and so the lighting is pleasantly reflected with the laser design. The symmetrical light distribution creates harmonious iTUNction. The light falls from above into the glassless.

Key Advantages

- Laser light reflection
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance
- Interesting light sculpture

Characteristics

Aluminium body

SIMPLEX

Outdoor Type
LED Bollard Lighting

LED luminare for public lighting combining the elegance and simplicity of its cylindrical shape designed to guarantee the best performance.

Simplex produces different lighting effects depending on the version of the screen. The increased diffusion and homogeneity of light reduce the number of installations, optimizing consumption and reducing light pollution in urban areas. It is available in different color temperatures and wattages to better meet the needs of the lighting project.

Characteristics

Aluminium Body

High efficiency LED lighting

Electrostatic powder paint

High quality silicone gasket

Galvanized metal anchorage

Aluminium PCB

LED with Life Span >100.000 Hours

DECORATIVE LIGTING POLE SERIES

www.hb-lux.com

ACT

Outdoor Type
Decorative Lighting Poles

The elegant sobriety of ACT, combined with state-of-the-art lighting technology, ensures its over-average versatility. It can easily be integrated in just about any architectural environment and fulfils every requirement - lighting paths in compliance with safety standards, used in a row as a light signet, as design-oriented decorative lighting or as a standard guidance system.

Various light distributions, lumen packages, sizes and configurations make these highly adaptable LED outdoor luminaires even more flexible. Depending on personal taste and the area of installation, ACT can be used as pole-top luminaire. When the optional luminaire is added to the latter, it produces a symbolic, almost archetypal effect without loosing its characteristically modern simplicity.

Key Advantages

- Can be easily integrated to many designs
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance

Characteristics

APOLLO L

Outdoor Type
Decorative Lighting Poles

Apollo L's soft light cone creates strikingly beautiful light patterns and reveals stylistic finesse, which bewitches both owner and spectator. Thanks to APOLLO L, stone comes to life and buildings can tell stories. This almost magic effect is due to a very pragmatic approach, namely that extraordinary performance creates extraordinary effects.

The housing made of powder-coated, corrosion-free aluminium forms a uniform and integrated whole, and features a high-quality finish in metallic colours.

Key Advantages

- Flawless cylindrical form
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance

CLAS

Outdoor Type
Decorative Lighting Poles

CLAS represent the maximum expression of love and respect for the tradition of great historical city centers.

This HB-LUX decorative classic layout is ideal for lighting public parks, squares or pedestrian areas. The urban lighting version is perfect to complement the public lighting of a park or a pedestrian area, ideal for adding elegance to an entrance or to enhance city parks, squares or pedestrian areas. with a classic-style décor is able to enhance the value of historic city centres giving them a timeless style.

Key Advantages

- Aluminium Body
- Smart energy savings
- Delivery of complete assembly
- Corrosion resistance

Characteristics

Aluminium body

High efficiency LED lighting

Electrostatic powder paint

High quality silicone gasket

Galvanized metal anchorage

Aluminium PCB

LED with Life Span >100.000 Hours

CCT tolerance within a 3 step MacAdams ellipse

Corrosion Protection

5 Years Warranty

Marine Coating (Optional)

ENEC Certified Driver

Applications

COAST

Outdoor Type
Decorative Lighting Poles

The elegant sobriety of COAST, combined with state-of-the-art lighting technology, ensures its over-average versatility. It can easily be integrated in just about any architectural environment and fulfils every requirement - lighting paths in compliance with safety standards, used in a row, as design-oriented decorative lighting or as a standard guidance system.

Various light distributions, lumen packages, sizes and configurations make these highly adaptable LED outdoor luminaires even more flexible. Depending on personal taste and the area of installation, COAST can be used as pole-top luminaire. When the optional luminaire is added to the latter, it produces a symbolic, almost archetypal effect without loosing its characteristically modern simplicity.

Key Advantages

- Can be easily integrated to many designs
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance

OASIS

Outdoor Type
Decorative Lighting Poles

OASIS combines a squared, elegant shape to radial optics specially designed to ensure the best lighting performance, producing different light effects based on the screen type.

The OASIS range of outdoor urban pole is resplendent in its versatility and clear design style. Yet its star qualities are in no way diva-like. Quite the opposite in fact: it is robust, efficient and flexible. The high-quality lighting tool is suitable for professional use and accentuation in a wide variety of indoor and outdoor applications. The standard design makes it easy to combine the three different sizes.

Key Advantages

- Clear design for all outdoor design
- Economic and efficient
- Easy installation
- High performance LED
- High corrosion resistance

STREAM

Outdoor surface type LED
Bollard Lighting

Solidity and resistance combined to an elegant design with straight lines give life to this innovative luminaire for urban and public lighting. STREAM is provided with a diffused and adjustable optic that guarantees a homogeneous and comfortable lighting while producing a well-directed beam, which is perfect for street lighting, without producing light pollution.

It is available for pole installation in different module numbers. Light, multifunction and design - three elements that we have brought together in a unique lighting system. With these three criteria: light, multifunction and design creates a high quality of life and stay there, and a pleasant atmosphere.

Characteristics

Aluminium body

High efficiency LED lighting

Electrostatic powder paint

High quality silicone gasket

Galvanized metal anchorage

Aluminium PCB

LED with Life Span >100.000 Hours

CCT tolerance within a 3 step MacAdams ellipse

Corrosion Protection

5 Years Warranty

Marine Coating (Optional)

ENEC Certified Driver

Key Advantages

- Aluminium Body
- Smart energy savings
- Delivery of complete assembly
- Corrosion resistance

Applications

Landscape

Outdoor

Urban

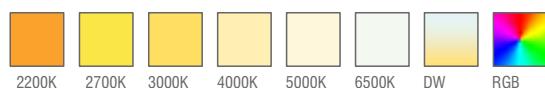

STREAM

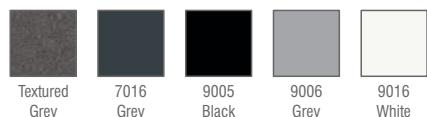

Standard Product

Input	100-305V / AC 50-65Hz
Control	On / Off
Optic	Symmetrical
Light Color	4000K
Body Color	7016 Grey
CRI	>82
Protection	IP66
Impact Resistance	IK09
Protection class IEC	Class I
Power factor (min.)	0,092
Weight	- kg
Ambient Temperature	-30°C / +60°C

SYMBOL

Outdoor Type
Decorative Lighting Poles

Smooth lines blend harmoniously with a variety of architecture. The circle shaped housing of aluminum is available in different sizes to satisfy a variety of building scale requirements. Modern and original design, able to integrate into any urban environment.

Various light distributions, lumen packages, sizes and configurations make these highly adaptable LED outdoor luminaires even more flexible. Depending on personal taste and the area of installation, SYMBOL can be used as pole-top luminaire. It produces a symbolic, almost archetypal effect... without losing its characteristically modern simplicity.

Key Advantages

- Aluminium Body
- Smart energy savings
- Delivery of complete assembly
- Corrosion resistance

PACIFIC

Outdoor Type
Decorative Lighting Poles

PACIFIC combines an elegant shape to radial optics specially designed to ensure the best lighting performance, producing different light effects based on the screen type.

The PACIFIC range of outdoor urban Pole is resplendent in its versatility and clear design style. Yet its star qualities are in no way diva-like. Quite the opposite in fact: it is robust, efficient and flexible. The high-quality lighting tool is suitable for professional use and accentuation in a wide variety of indoor and outdoor applications. Within this section we have products with optical performance suitable for residential roads, traffic routes, public amenity areas, pedestrian crossings, parks, footpaths, cycle ways, rail platforms and many other exterior applications. The standard design makes it easy to combine the three different sizes.

ARCHE

Outdoor Type
Decorative Lighting Poles

The elegant sobriety of ARCHE combined with state-of-the-art lighting technology, ensures its over-average versatility. It can easily be integrated in just about any architectural environment and fulfils every requirement - lighting paths in compliance with safety standards, used in a row, as design-oriented decorative lighting or as a standard guidance system.

Various light distributions, lumen packages, sizes and configurations make these highly adaptable LED outdoor luminaires even more flexible. Depending on personal taste and the area of installation, ARCHE can be used as pole-top luminaire. When the optional luminaire is added to the latter, it produces a symbolic, almost archetypal effect without loosing its characteristically modern simplicity.
